

— AXIS W120 BODY WORN CAMERA

# CELLULAR CONNECTED. ALWAYS ON.

The **AXIS W120** is the only camera in the AXIS Body Worn lineup with a built-in LTE/4G modem. It streams live video and reports its location straight from the camera itself, no paired phone required, so your team stays connected the moment it matters.

Built-in LTE/4G

Live Streaming

GPS Location

No Paired Phone Needed

**Cellular connected. Always in reach.**

Live video and location reach your team the instant an incident starts, with no WiFi and no paired phone required.

## LTE/4G

Built-in cellular modem

## GPS

Live location tracking

## 15 HRS

Battery on a single charge

## THE AXIS ECOSYSTEM

### One camera, a full evidence and connectivity system

#### Built-in LTE/4G Modem

Streams live video and status over its own cellular connection, no paired smartphone required, unlike the WiFi-only cameras in the lineup.

#### AXIS Body Worn Manager Pro

Licensed fleet management software organizes footage, camera assignments, and system health across every unit and dock.

#### AXIS W401 Activation Kit

Pairs with a vehicle lightbar, siren, or trigger device to automatically start recording the instant an incident begins.

#### GPS Location Tracking

Every camera reports its live location, so supervisors and dispatch can see exactly where an incident is unfolding.

#### AXIS Body Worn Live

Cloud or self-hosted live-streaming license lets authorized viewers watch a camera feed in real time as an incident unfolds.

#### Full Accessory Lineup

Docking stations, chest harnesses, MOLLE and screw-on mounts, and the W800 system controller all scale with your fleet.

### One ecosystem, built to scale

From a single camera to a fleet of dozens, the W120 shares docking stations, mounts, activation kits, and licensing across the entire AXIS Body Worn lineup, so growing your program never means starting over.
