CONNECTED RESPONSE FOR K-12 SCHOOLS

EVERY SECOND COUNTS ON EVERY CAMPUS.

XGen Connected Response puts a silent call for help in every hand and on every wall: wearable and wall-mounted panic buttons that trigger an instant, location-aware alert and lockdown, and connect straight to 911 with your school's verified location.

Alyssa's Law Aligned | Direct to 911 | Multi-Press SOS | Standalone or Integrated

Instant alerts. Faster response. Safer campuses.

From silent activation to campus-wide lockdown, staff coordination, and 911 connection with your school's verified location, in seconds.

COMPLIANCE

Silent panic alerts now required under Alyssa's Law

- **Enacted in 14 states:** NJ, FL, NY, TX, TN, UT, OK, LA, GA, WA, OR, VA, WV & IL.
- **More states pending:** Additional legislatures are actively considering silent panic-alert requirements for schools.
- **Direct 911 connection:** Activation routes straight to local dispatch with your school's verified location.
- **Accountability built in:** Roll call, guardian-verified reunification, and visitor management for the aftermath.

Mandates vary by state and change frequently. This is general information, not legal advice; confirm current requirements for your jurisdiction. Enacted-state list as published at xgenmobile.com, 2026.

WHY IT WORKS

Built for how a real emergency unfolds

Silent Panic Buttons
Wearable lanyard devices, wall-mounted buttons, and app, keyboard, or phone triggers. Multi-press SOS helps prevent false alarms.

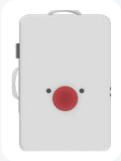
Help to the Exact Spot
In-building beacons place the alert on a live responder map, down to the room or area, and guide help to the exact spot.

Facility-Wide Alerting
Audible and visual alerts, automated paging, strobes, and on-screen messages reach every zone at once, tailored to your protocols.

Real-Time Staff Coordination
Instant push and text notifications show who pressed and where, with live group chat for shared situational awareness.

Verify: Everyone Accounted For
Roll call from any device, guardian-verified reunification with time-stamped records, and visitor screening at the door.

Built and Supported in the USA
Devices designed, built, and supported domestically. Run standalone or integrate with your existing paging and intercom.



Silent panic buttons: worn, wall-mounted, or on any device

A discreet, deliberate multi-press activation silently triggers campus-wide response, sends room-level location to staff and administrators on the live responder map, and connects 911 dispatch with your school's verified location and emergency context. No audible alarm, no escalation.

Detect. Alert. Respond.
