

FAST 5G, SIMPLE TO SET UP, EASY TO MANAGE.

The **JEXtream line from Franklin Access** gives your sites, vehicles, and field teams dependable connectivity through 5G mobile hotspots and 5G fixed wireless access, with cloud-based device management across the whole fleet. XGen Mobile delivers it as one managed program.

5G and 4G LTE

Wi-Fi 6 and Wi-Fi 7

Fixed wireless access

Cloud device management

Dependable 5G, delivered as one managed program.

JEXtream hotspots, routers, and fixed wireless access, with cloud device management across the fleet.

5G

Mobile hotspots and fixed wireless access

Fleet

Cloud-based management across every device

Days

Simple setup with nothing to build on site

Performance depends on carrier coverage.

WHAT IT DOES

Connectivity for the way your business runs

At the Site

5G fixed wireless access routers for primary internet or wired backup.

Across the Fleet

Secure, scalable connectivity with centralized device lifecycle control.

Cloud Device Management

Provision, monitor, and control the whole fleet remotely.

On the Go

Portable 5G hotspots for travel and field work, with multi-device support.

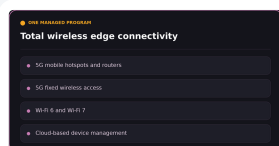

Enterprise 5G Devices

The JEXtream line of hotspots and routers, carrier-certified.

One Managed Program

XGen Mobile delivers connectivity and management as a single program.

One managed 5G program

Hotspots, routers, and fixed wireless access with cloud-based device management, delivered and supported by XGen Mobile as a single program.

Connect. Manage. Scale.
