

NOBODY TEACHES ALONE.

A lanyard safety button with two jobs. **One alerts your front office. The other reaches 911** with your school's location.

FAITH-BASED SCHOOL STARTER

\$3,999

**Everything for
the first year.**

- ✓ **Five G2 safety buttons**, yours to keep
- ✓ **Cellular service included**, nothing separate to manage
- ✓ **E-911** with your school's location
- ✓ **Training** for your staff and volunteers

Renewal locked in writing: years 2 and 3 at \$2,343 a year. About \$2.19 per person per day in year one. Order by December 31, 2026.

Plan first

A growing number of states have passed school panic alarm laws. Most apply only to public schools. Oregon now asks private schools to consider a panic alert system in their safety plans, and Illinois will from 2027. A way to call for help is where that plan starts.

Source: state Alyssa's Law statutes, reviewed October 2026. Requirements vary by state; check your state's current law. Not legal advice.

Two buttons, two jobs

A press of the side button alerts your front office. The E-911 button takes several deliberate presses, so it is not set off by accident.

911 knows where

E-911 alerts go out through RapidSOS with your school's location, so help knows where to go.

Nothing to install

No wiring, no servers. The buttons run on their own cellular, not your Wi-Fi. Worn as an ID badge, charged by USB-C about every 90 days. Charge life varies with use.

\$3,999 reflects current supplier pricing for orders placed by December 31, 2026. Taxes and fees not included. Details and pricing on the back.

HOW IT WORKS

- 1** A teacher, aide, or office staff member presses the button.
- 2** Your front office gets a real-time alert on their phones.
- 3** For an emergency, the E-911 button reaches 911 with your school's location.

Two buttons. Worn as an ID badge.

Also available: wall-mounted panic buttons for the front desk or carpool check-in, with a microphone so responders can listen in. These require installation and a network connection.

Connected safety and communication solutions for faith-based schools. **Detect. Alert. Respond.**

PREPARE TODAY. PROTECT TOMORROW.

Faith-based schools open their doors to families every day. No federal law requires a panic button in a school, and most state laws cover public schools only. The federal guidance written for K-12 schools starts with a plan. A way to call for help lets your staff carry that plan out.

— WHERE THE GUIDANCE STANDS

- **Alyssa's Law, state by state:** states from New Jersey to Georgia now require public schools, and in some states charter schools, to have a panic alarm. Illinois (effective January 1, 2027) and Oregon (2025) ask private schools to consider a panic alert system in their safety plans. No state requires a private school to install one today.
- **CISA K-12 School Security Guide:** the 3rd Edition (2022) notes that duress alarms can provide a direct connection to local law enforcement and emergency responders during an incident, and lists panic buttons among the ways a school can communicate a threat.
- **FEMA Nonprofit Security Grant Program:** 501(c)(3) nonprofit schools, including religious schools, have been eligible to apply. The FY2026 window closed in July 2026; ask your State Administrative Agency about future rounds. Eligibility and allowable costs are set each funding year, so ask before assuming a device qualifies.
- **Where the G2 fits:** it gives trained staff a way to alert your front office and, in an emergency, 911. It is not a mass notification or lockdown system, and it supports a response plan rather than replacing one.

— PRICING

Starter package	Everything for the first year: five G2 safety buttons that are yours to keep, cellular service, E-911, and training for your staff and volunteers.	\$3,999
Additional buttons	Add a person any time. Button and one year of connectivity.	\$365.92 each
Years 2 and 3	Communicator, cellular, and E-911 renewal. Locked in writing for orders by December 31, 2026.	\$2,343 / yr

Pricing reflects current supplier rates for orders placed by December 31, 2026. Year 4 renewals are quoted at supplier pricing then. Wall-mounted panic buttons are quoted separately. Taxes and fees not included.

— COMMON QUESTIONS

Who owns the buttons?

You do. They are a one-time purchase in year one.

What does the front office see?

A real-time alert on their phones when the button is pressed.

Do the buttons need our Wi-Fi?

No. Each button has its own cellular connection, and the service is included.

What if our campus has more than one building?

E-911 is set up for one site, and 911 receives that site's location. Your front office can see where the button is in the G2 Communicator if someone is monitoring it. Ask us about covering more than one address.
