CONNECTED RESPONSE FOR HOTELS

NO ROOM TURNED ALONE.

A lanyard safety button with two jobs. **One alerts your manager. The other reaches 911** with your property's location.

PROPERTY STARTER

$3,999

Everything for the first year.

- **Five G2 safety buttons**, yours to keep
- **Cellular service included**, no data plan per button
- **E-911** with your property's location
- **Training** for your staff

Renewal locked in writing: years 2 and 3 at $2,343 a year. About $2.19 per person per day in year one. Order by December 31, 2026.

Alone in a room

The EEOC's Select Task Force on workplace harassment named isolated workspaces as a risk factor, with housekeepers working alone in hotel rooms among its examples.

Source: EEOC, Report of the Co-Chairs of the Select Task Force on the Study of Harassment in the Workplace, June 2016.

2 Two buttons, two jobs

A press of the side button alerts your manager. The E-911 button takes several deliberate presses, so it is not set off by accident.

Help knows where to go

E-911 alerts go out through RapidSOS with your property's location.

Nothing to install

No wiring, no servers. The buttons run on their own cellular, not property Wi-Fi. Worn as an ID badge, charged by USB-C about every 90 days. Charge life varies with use.

HOW IT WORKS

1. A housekeeper or room attendant presses the button.
2. Your manager gets a real-time alert on their phone.
3. For an emergency, the E-911 button reaches 911 with your property's location.

Two buttons. Worn as an ID badge.

Also available: wall-mounted panic buttons for the front desk or back office. These require installation and a network connection.

Let's talk about your property.

Tell us who works alone, and when. We will help you decide what you need.

G2 LANYARD SAFETY BUTTON

PREPARE TODAY. PROTECT TOMORROW.

Whether a panic button is required at your property depends on your state and your city. The reasons to carry one do not.

WHERE THE RULES STAND

- **Washington** requires hotels and motels to provide a panic button to each isolated employee, including housekeepers and room service attendants, with no room-count threshold. L&I enforcement and civil penalties took effect January 1, 2026.
- **New Jersey** requires panic buttons at hotels with 100 or more guest rooms. **Oakland** applies at 50 or more rooms. **Los Angeles** and **Miami Beach** apply to hotels of any size.
- **Illinois** also has a statewide hotel law. **Other cities**, including Chicago and Seattle, have hotel worker ordinances with panic button requirements. Most states have none. Rules change; confirm yours.
- **Voluntary commitments** such as the AHLA 5-Star Promise cover the brands and companies that signed on. An independent property is not covered unless it did.

Pricing reflects current supplier pricing for orders placed by December 31, 2026. Year 4 renewals are quoted at supplier pricing then. Taxes and fees not included.

COMMON QUESTIONS

Who owns the buttons?

You do. They are a one-time purchase in year one.

What does a manager see?

A real-time alert on their phone when the button is pressed.

Do the buttons need property Wi-Fi?

No. Each button has its own cellular connection, and the service is included.

Does 911 know which room?

No. E-911 sends 911 your property's location. Your manager can see where the button is in the G2 Communicator if someone is monitoring it. Ask us about larger or multi-building properties.
