

NOBODY SERVES ALONE.

A lanyard safety button with two jobs.
One alerts your safety team. The other
reaches 911 with your building's location.

PLACES OF WORSHIP STARTER

Everything for
the first year.

\$3,999

- ✓ **Five G2 safety buttons**, yours to keep
- ✓ **Cellular service included**, no data plan per button
- ✓ **E-911** with your building's location
- ✓ **Training** for your staff and volunteers

Renewal locked in writing: years 2 and 3 at \$2,343 a year. About \$2.19 per person per day in year one. Order by December 31, 2026.

Plan first

CISA analyzed ten years of targeted attacks on houses of worship. Its security guide recommends a plan with emergency action and incident response plans. A way to call for help is where that plan starts.

Source: CISA, Mitigating Attacks on Houses of Worship Security Guide, December 2020. Voluntary federal guidance, not a legal requirement.

2 Two buttons, two jobs

A press of the side button alerts your safety team. The E-911 button takes several deliberate presses, so it is not set off by accident.

911 knows where

E-911 alerts go out through RapidSOS with your building's location, so help knows where to go.

Nothing to install

No wiring, no servers. The buttons run on their own cellular, not your Wi-Fi. Worn as an ID badge, charged by USB-C about every 90 days. Charge life varies with use.

HOW IT WORKS

- 1 A greeter, usher, or volunteer presses the button.
- 2 Your safety team gets a real-time alert on their phones.
- 3 For an emergency, the E-911 button reaches 911 with your building's location.

Two buttons. Worn as an ID badge.

Also available: wall-mounted panic buttons for the welcome desk or childcare check-in, with a microphone so responders can listen in. These require installation and a network connection.

Let's talk about your campus.

Tell us who serves alone, and when. We will help you decide what you need.

Connected safety and communication solutions for places of worship. *Detect. Alert. Respond.*

PREPARE TODAY. PROTECT TOMORROW.

Places of worship are built to be open to everyone. The federal security guidance written for them is voluntary, and it starts with a plan. A way to call for help lets your people carry that plan out.

— WHERE THE GUIDANCE STANDS

- **CISA Security Guide:** CISA analyzed ten years of targeted attacks on houses of worship. Its recommendations include a multi-layered security plan with emergency action and incident response plans.
- **CISA Self-Assessment:** asks whether employees and volunteers are trained on your plans, whether you coordinate with first responders, and whether you have mass notification capabilities.
- **FEMA Nonprofit Security Grant Program:** funds target hardening and other physical security enhancements for nonprofits at high risk of terrorist attack. Eligibility and allowable costs are set each funding year, so ask before assuming a device qualifies.
- **Where the G2 fits:** it gives trained staff and volunteers a way to alert your safety team and, in an emergency, 911. It is not a mass notification system, and it supports a response plan rather than replacing one.

Sources: CISA, Mitigating Attacks on Houses of Worship Security Guide (December 2020); CISA, Houses of Worship Security Self-Assessment; FEMA, Nonprofit Security Grant Program. Voluntary federal recommendations and a competitive grant program, not legal requirements. General information, not legal advice. Rules change; confirm yours.

— PRICING

Starter package	Everything for the first year: five G2 safety buttons that are yours to keep, cellular service, E-911, and training for your staff and volunteers.	\$3,999
Additional buttons	Add a person any time. Button and one year of connectivity.	\$365.92 each
Years 2 and 3	Communicator, cellular, and E-911 renewal. Locked in writing for orders by December 31, 2026.	\$2,343 / yr

Pricing reflects current supplier rates for orders placed by December 31, 2026. Year 4 renewals are quoted at supplier pricing then. Wall-mounted panic buttons are quoted separately. Taxes and fees not included.

— COMMON QUESTIONS

Who owns the buttons?

You do. They are a one-time purchase in year one.

What does the safety team see?

A real-time alert on their phones when the button is pressed.

Do the buttons need our Wi-Fi?

No. Each button has its own cellular connection, and the service is included.

What if we have more than one building?

E-911 is set up for one site, and 911 receives that site's location. Your safety team can see where the button is in the G2 Communicator if someone is monitoring it. Ask us about covering more than one address.
