

— HOME HEALTH | HOME CARE | HOSPICE

EVERY CONTROL YOU HAVE STOPS AT THE FRONT DOOR.

XGen Connected Response gives home health nurses, aides, and hospice staff a worn badge they can press without unlocking a phone or explaining an address. A patient's home is a worksite with no security staff, no cameras, and nobody down the hall.

Silent one-press alert

Multi-Press 911 via RapidSOS

Cellular and GNSS built in

2 oz badge, 90 days per charge

Alone on the visit. Not alone on the alert.

A worn badge your clinician can press without letting the room see them do it.

22.3%

Of home healthcare workers experienced patient-perpetrated violence in a 12-month period, pooled across 21 studies

41%

As many as this share of home healthcare workers have reported sexual harassment

9%

Of home health RNs in one study reported firearms in the patient's home. Drug use in the home: 13%

Prevalence: Byon et al., Am J Ind Med 2020. Harassment and in-home hazards: NIOSH 2021, citing published studies. Feature availability varies by configuration.

WHY IT WORKS

Help for a worksite with nobody down the hall

One Press, Not a Phone Call

A worn badge with two programmable SOS buttons and haptic confirmation. No phone to find, unlock, or explain.

Cellular and GNSS Built In

The badge hardware carries LTE Cat-M1 cellular, Wi-Fi, Bluetooth, and outdoor GNSS, with USB-C charging.

A Response, Not Just a Noise

OSHA's field guidance: ensure workers have cell phones or panic buttons, and arrange a reliable response system when an alarm is triggered. Alerts reach your whole response list, not one inbox.

Multi-Press 911

When enabled, a deliberate multi-press reaches a RapidSOS safety agent who relays the emergency to the 911 telecommunicator, and helps prevent accidental 911 calls.

Your Team Knows Who Pressed

Every enrolled contact gets a real-time notification and text naming who pressed the button.

Built to Be Worn Every Shift

Two ounces on a lanyard with a built-in ID holder, USB-C charging, and roughly 90 days per charge.

The wearable badge for staff who work alone

A 2 oz badge with built-in ID holder, two programmable SOS buttons, haptic confirmation, and roughly 90 days per charge. LTE Cat-M1 cellular and outdoor GNSS are built into the hardware. A silent press alerts your team; a deliberate multi-press routes, when enabled, through RapidSOS to 911. No audible alarm.

Detect. Alert. Respond.
