

FOUR PLATFORMS. ONE PARTNER. ONE INVOICE.

XGen Mobile licenses, registers, and activates Samsung Knox Suite, Hexnode UEM, Scalefusion, and Microsoft Intune. Match the platform to your fleet, then order it the same way you order the rest of your XGen safety stack.

Samsung Knox Suite

Hexnode UEM

Scalefusion

Microsoft Intune

Pick the console. We handle the rest.

Most customers run one primary platform. We help you choose, quote and order the licenses, and load your devices before they arrive on site.

SIDE BY SIDE

Which platform fits your fleet?

	Samsung Knox Suite	Hexnode UEM	Scalefusion	Microsoft Intune
Best fit	Fleets that are mostly Galaxy phones and tablets and want hardware-backed security	Mixed fleets with a small IT team that wants one console for everything	Rugged handhelds, kiosks, point of sale, and Lenovo tablet deployments	Teams already on Microsoft 365 that want device policy tied to Microsoft identity
Platforms managed	Galaxy first. Knox Manage (Essentials and up) can also manage Android, iOS, iPadOS, Windows, macOS, ChromeOS via its original console	Android, iOS, iPadOS, Windows, macOS, ChromeOS, Linux, tvOS, Android TV, Fire OS, visionOS, Zebra Link OS	Android, iOS, macOS, Windows, Linux, ChromeOS, tvOS	Windows, Android, iOS, iPadOS, macOS, Linux, ChromeOS
Licensing basis	Per device, 1 or 2 year terms. Base plan included with Galaxy purchase	Per device, monthly or annual, 15-device minimum	Per device, annual, 10-device minimum	Per user (Plan 1 included in M365 E3, E5, Business Premium). Device-only license for kiosks and shared devices
Plans	Base, Essentials, Enterprise	Pro, Enterprise, Ultimate, Ultra	Starter, Business, Enterprise	Plan 1, Plan 2 add-on, Intune Suite add-on
Enrollment methods	Knox Mobile Enrollment (survives factory reset), Android zero-touch; QR for manual setup	Android zero-touch, Knox Mobile Enrollment, Apple ADE, Windows Autopilot; QR for manual setup	Android zero-touch, Knox Mobile Enrollment, Apple Business Manager, Windows Autopilot; QR for manual setup	Android zero-touch, Knox Mobile Enrollment, Apple ADE, Windows Autopilot; QR for manual setup
Lost device controls	Remote lock and wipe via Knox Manage	Remote lock, remote wipe, app allow and block lists	Remote lock, factory reset, app allow and restrict	Remote wipe on Windows, Android, iOS, macOS, ChromeOS; remote lock on corporate-owned Android, iOS, macOS; app allow and block lists
Standout strengths	Hardware-backed security, Knox E-FOTA update control, remote support, Enterprise Edition devices include one year of Enterprise plan	Broad platform list (11 OSes), kiosk mode, geofencing, automation and remote control in higher tiers	Kiosk lockdown, Lenovo FOTA and OEMConfig integration, simple annual licensing	Windows Autopilot, Conditional Access, app protection policies for BYOD, native Microsoft 365 integration

Platform, plan, and feature details as published by Samsung, Hexnode, Scalefusion, Lenovo, and Microsoft, September 2026. Vendors change plans and features; confirm current details with XGen before ordering. Device-only Intune licenses do not support app protection policies or Conditional Access.

From order to enrolled device, without the runaround

Tell us your platform, device count, and timeline. We quote and order the licenses, load your devices into the console, and activate them before they arrive on site. Devices pick up policy on first power-on with zero-touch enrollment, or with a quick QR scan at setup.

Detect. Alert. Respond.
