

ONE CONSOLE FOR EVERY PLATFORM.

Hexnode UEM manages Android, iOS, Windows, macOS, ChromeOS, Linux, and more from a single cloud console, licensed per device. It is the right choice when your fleet is mixed and your IT team is small. XGen quotes, orders, and sets up the licenses for you.

Android, iOS, Windows, macOS

Kiosk Lockdown

Per-Device Licensing

Zero-Touch and QR Enrollment

Mixed fleet. Single pane of glass.

Corporate policies lock in the moment a device comes online, whether it enrolled through zero-touch, Knox, Apple Business Manager, Windows Autopilot, or a QR code.

APPLICATIONS

Where Hexnode fits

- **Kiosk and single-purpose devices:** Lock tablets and phones to one app or an approved set for retail, digital signage, check-in, and self-service.
- **Office and knowledge workers:** Directory integration, app distribution, and web filtering across laptops, desktops, and phones.
- **Field and delivery teams:** Location tracking shows where devices are, and geofencing (Enterprise plan and above) applies rules when a device leaves a defined area.
- **Screens and specialty devices:** Apple TV, Android TV, Fire OS, and Zebra Link OS devices are managed alongside phones and laptops.

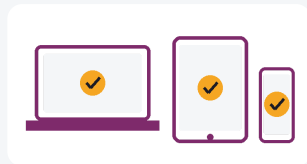

Platform and plan features as published by Hexnode, September 2026. Some features depend on plan tier; confirm current details with XGen before ordering.

FEATURES

What you get with Hexnode UEM

- **Broad Platform Coverage**
Android, iOS and iPadOS, Windows, macOS, ChromeOS, Linux, tvOS, Android TV, Fire OS, visionOS, and Zebra Link OS from one console.
- **App Management**
Distribute and update apps remotely, and allowlist or blocklist apps on Android Enterprise, iOS, and macOS devices.
- ✓ **Kiosk Mode**
Turn Android devices and supervised iPhones and iPads into locked-down, single-purpose devices running only the apps you approve.

- ⦿ **Every Enrollment Method**
Android zero-touch, Samsung Knox Mobile Enrollment, Apple Automated Device Enrollment, Windows Autopilot, and QR code enrollment.
- ▲ **Lost Device Protection**
Remote lock, remote wipe, and passcode enforcement keep company data safe if a device is lost or an employee leaves.
- ★ **Automation and Remote Control**
Higher plan tiers add scripting, automation, remote screen control, patch management, and BitLocker management.

Four plans: Pro, Enterprise, Ultimate, and Ultra

Pro covers the MDM essentials including kiosk management, app distribution, and location tracking. Enterprise adds desktop management, geofencing, directory integration, and web filtering. Ultimate adds automation, scripting, Windows Autopilot, and remote control. Ultra adds patch management and BitLocker. Licensed per device with a 15-device minimum. Tell XGen your platforms and device count and we handle the rest.

Detect. Alert. Respond.
