DEVICE MANAGEMENT FOR THE JEXtream FLEET

ONE DASHBOARD. EVERY JEXtream HOTSPOT MANAGED.

JEXtream MDM, direct from Franklin Access, gives you real time visibility and control of compatible JEXtream devices in the field. Order and support come through XGen Mobile, one partner, one invoice, alongside the rest of your connectivity stack.

Direct from Franklin Access | Cloud Dashboard | Fleet Wide Control | One Partner, One Invoice

Every device visible. Every device managed.

Real time fleet visibility, remote configuration, and content and hardware controls, all from one cloud dashboard.

ENTERPRISE MOBILITY

Built for the mobile enterprise

- **Enhanced Workforce Productivity:** Easy access to critical resources keeps employees connected and productive from anywhere.
- **Scalability and Flexibility:** Scalable enterprise mobility that grows with your organization, without a rip and replace.
- **Customizable Security:** Security settings built around your organization's needs safeguard sensitive data and mitigate risk.
- **Advanced Tracking:** Device tracking and real time performance monitoring keep the fleet configured, updated, and compliant.

Features and capabilities as published by Franklin Access at franklinaccess.com/jextream-mdm, 2026.

WHAT YOU GET

Full control of the fleet, from one console

Interactive Dashboard
Real time insights and easy navigation to control every connected JEXtream device from one cloud console.

Data Usage Reporting
Track data consumption fleet wide for informed, cost effective mobile asset management.

Enable / Disable Hardware
Command device hardware remotely to manage usage and optimize security and resource use.

Configuration Management
Direct control over access point name (APN), wireless connectivity, firewall, and mobile settings across the fleet.

Content Filtering
Control and customize content access to keep every device compliant with your policies.

Customizable Security
Security settings built around your organization's needs, applied consistently across every device.

Manage the fleet from any screen

JEXtream MDM runs from desktop, tablet, or phone, so your team can check status, push configuration, or lock down a lost device from wherever they are.

Detect. Alert. Respond.
