

ALREADY ON MICROSOFT 365? START HERE.

Microsoft Intune is Microsoft's cloud service for managing devices and apps. Plan 1 is included in Microsoft 365 E3, E5, and Business Premium, so many teams already own it. Licensed per user, with a device-only option for kiosks.

Included in M365 E3 and E5

Windows Autopilot

Conditional Access

Manage devices where your identity already lives.

Intune ties device compliance to Microsoft Entra ID, so access to email and files can depend on the device meeting your policy.

APPLICATIONS

Where Intune fits

- **Windows laptops and desktops:** Windows Autopilot delivers a new PC that configures itself once the user connects to a network and signs in.
- **Kiosks and shared devices:** A device-only Intune license covers kiosks, dedicated devices, and other devices without a named user.
- **Android and iOS phones:** Android zero-touch, Samsung Knox Mobile Enrollment, and Apple Automated Device Enrollment bring phones into policy out of the box.
- **Personal devices (BYOD):** App protection policies keep company data inside managed apps without enrolling the employee's personal phone.

Licensing and features as published by Microsoft, September 2026. Device-only licenses do not support app protection policies or Conditional Access. Confirm current details with XGen before ordering.

FEATURES

What you get with Intune

- **Windows Autopilot**
Ship a PC straight to the user. When they connect to a network and sign in, it joins your tenant, installs apps, and applies policy.
- **Conditional Access**
With a Conditional Access policy (a Microsoft Entra ID P1 capability), only devices that meet your compliance policy reach Microsoft 365 email and files.
- ✓ **Remote Actions**
Remote wipe on Windows, Android, iOS, macOS, and ChromeOS; remote lock on corporate-owned Android, iOS, and macOS; app allow and block lists.
- ◎ **Every Major Platform**
Windows, Android, iOS and iPadOS, macOS, Linux, and ChromeOS managed from the same Microsoft admin center.
- ▲ **App Protection Policies**
Control copy, paste, and save inside Microsoft 365 apps and line-of-business apps built with the Intune SDK, on managed and unmanaged devices.
- ★ **Grows With Add-Ons**
Intune Plan 2 and the Intune Suite add advanced capabilities on top of Plan 1 when you need them.

Plan 1, Plan 2, and the Intune Suite

Plan 1 is the core service and is included in Microsoft 365 E3, E5, EMS E3 and E5, and Business Premium. Plan 2 and the Intune Suite are add-ons. A device-only license covers kiosks and shared devices without a named user. Tell XGen what you already own and we will map the right licenses.

Detect. Alert. Respond.
