

SECURITY THAT STARTS IN THE CHIP.

Samsung Knox Suite pairs hardware-backed security with fleet management in one per-device license. Galaxy phones and tablets enroll themselves on first power-on, land in policy, and stay managed and protected from one admin portal. XGen quotes, orders, and registers the devices for you.

Hardware-Backed Security

Out-of-Box Enrollment

Per Device, Per Year

Optimized for Galaxy

Secure by design. Managed from day one.

Knox Mobile Enrollment enrolls a new Galaxy device into policy as soon as it is turned on and connected, and the enrollment survives a factory reset.

APPLICATIONS

Where Knox Suite fits

- **Frontline and field teams:** Galaxy phones and tablets for warehouse, delivery, and field staff, with hardware key remapping and barcode scanning tools in the Enterprise plan.
- **Mixed fleets:** Knox Manage, included in the Essentials and Enterprise plans, can also manage Android, iOS, iPadOS, Windows, macOS, and ChromeOS devices through its original console.
- **Galaxy-first fleets:** The best fit when most of your devices are Galaxy phones or tablets and you want security that is built into the hardware.
- **Galaxy Enterprise Edition:** Enterprise Edition devices include one year of the Knox Suite Enterprise plan.

Plan contents as published by Samsung, September 2026. Plans and features change; confirm current details with XGen before ordering.

FEATURES

What you get with Knox Suite

Knox Platform for Enterprise

Government-grade device and data protection, hardware-backed and built into Galaxy devices from the start.

Knox Manage

Cloud console for policies, app deployment, remote lock and wipe, and reporting. Included in the Essentials and Enterprise plans.

Granular OS Update Control

Knox E-FOTA lets you control and schedule Android OS and security updates on your timetable. Enterprise plan.

Knox Mobile Enrollment

When devices are bought through a Knox Deployment Program reseller, device IDs are uploaded to your Knox account before shipment, so users only need to turn the device on. Other devices can be added with the Knox Deployment App or a QR code.

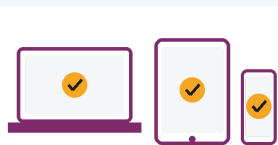

Knox Remote Support

See and troubleshoot a user's device remotely to keep downtime short. Included with Essentials and Enterprise.

Asset Intelligence and Insights

Device usage analytics and proactive security insights for large fleets. Enterprise plan.

Three plans, one license per device

Base is included with Galaxy device purchase and covers Knox Platform for Enterprise and Knox Mobile Enrollment. Essentials adds Knox Manage and Knox Remote Support. Enterprise adds OS update control, analytics, and frontline tools. Licenses run one or two years. Tell XGen your device count and timeline and we handle the rest.

Detect. Alert. Respond.
