4

Programmable buttons automate scans, apps, and communication

Specifications per device configuration.

WHAT IT DOES

One device for scan, capture, and communicate

Advanced Barcode Scanning

Reads 1D and 2D codes, including dirty, torn, and damaged labels.

Multi-Shift Power

Hot-swappable batteries keep devices running across full shifts.

Communication Ready

Voice, messaging, and apps on the same device your teams know.

AI-Assisted Capture

Speeds data capture with AI-assisted scanning and recognition.

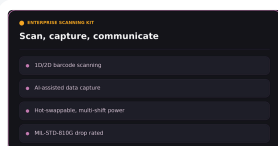

Built for Hard Use

Rugged, disinfectant-ready, and drop-rated to MIL-STD-810G.

Deployed and Managed

Configured, deployed, and centrally managed on Pixel or iPhone.

Scan, capture, communicate on one device

Enterprise-grade barcode scanning, AI-assisted capture, and communication on a rugged smart device your teams already know how to use.

Scan. Capture. Communicate.
